Islamabad, Pakistan

## SUMMARY

7 months of experience in front-end development knowledge in HTML, CSS, React Js, Redux. I have done different projects in university and made Livestock, Student QR Code websites using HTML, CSS, Bootstrap and JavaScript. Now working on more projects. 6 months of experience in android apps development. I have made 2 apps using Java language, Fake Call Prank and Best Match.

## EXPERIENCE

### Android Developer – Internship (March, 2022 – Present)

#### Hazza Institute and Technology

##### Fake Call Prank

- I created this app for Android mobile user.
- In this app the end user give input of fake screens by using screenshots.
- Create different modules like (audio call, another call & video call) for end user.

**Technologies:** XML, JAVA

##### Best Match

- I created this app for Android mobile user.
- This app is for Best Match makers.
- End user input their names and calculate the percentage of matching.

**Technologies:** XML, JAVA

### Front-end Development (January, 2022 – July, 2022)

#### Self-Employed

##### Student QR Code

- It is an online learning website.
- This website helps the end user for learning online.
- Create different modules for end user like (Lectures, Assignments, Quizzes, Notifications)

**Technologies:** HTML, CSS, Bootstrap and JavaScript

##### Livestock

- The purpose of Livestock is to provide online qurbani animals.
- Pictures and description are mentioned.
- Including the types and prices of the goats and other sacrificial animals.

**Technologies:** HTML, CSS, Bootstrap and JavaScript

### Data Entry Operator (February, 2017 – April, 2017)
